OUR SLOGAN: An Industrial Metropolis of Industrious People Who Pull Together.

Volume 25

THE REDCLIFF REVIEW THURSDAY, DEC. 5th 1935.

Number 4

## Suggest Moving Town Offices To New Quarters

To Building Recently Vacated By Local Legion

Now that the local Legion has moved to their new quarters many citizens are suggesting that the town should move the town offices to building vacated by the Legion.

It is the opinion that the move would be a wise one as the building on Third street would be much more commodious, an appropriate for the town office. Another reason given is that it would be much more convenient for the citizens when paying their monthly water, rent and gas accounts as this building is next to the gas office where monthly visits are necessary.

The Review is of the opinion that these two reasons are well worth considering by the council. Many other uses could be made of the present town hall.

## Alberte Boys Win Grain Judgin Prize

Win Championship at Furorist Royal Winter Fair

Justin Rigby and Arthur Mackay, of the Grand Prairie district, were proclaimed champions among boys in the National Competition held at the Toronto Royal Winter Fair. In individual standing Justin Rigby of Wembley led all Canadian grain judges with 554 points out of a possible 600; while his teammate Arthur Mackay of Tespe Creek was second with 530 points.

As the final results have been announced these boys were well pleased. Both boys were twenty years of age.

There is an open season for antelope between Dec 2 and 10 under certain regulations.

Mr. P. Birdwhistle of the Ringville district leaves this week for the east where he will board ship for England to visit his old home for a few months. Rumor has it that he will not come back alone.

## SPECIAL LOW FARES for CHRISTMAS and NEW YEARS

between all points in Canada

### FARE FOR QUARTER

For Christmas

Going -- Dec. 23 to 26

Returning until Dec. 28

### FARE FOR YEAR

Going Dec 30 to Jan 1

Return until Jan. 2, 1936

### FARE and a THIRD

for Christmas and New Year's

Going -- Dec. 20 to Jan 1

Return until Jan. 10 '36

of Fare, Train Service, Etc.

Apply Ticket Agent

Canadian Pacific

## Alberta Merchants be Licensed Jan. 1st

Preliminary Move For System Of Fixed Prices

All wholesale and retail merchants in Alberta will be licensed by the provincial government beginning Jan. 1st. It was announced by Premier Aberhart.

The move it was said, is being made at the instance of the merchants themselves and in some quarters is regarded as a preliminary to a system of merchandising codes of minimum or fixed prices on specific products in Alberta.

Cost of the license has not been decided, it was revealed, it is expected to be about \$5.00 each.

## Alberta Farmer is World Wheat King

Z. F. Wilford of Gavely Wins At Chicago

Z. F. Wilford, grain farmer from Stavely, Alberta, was proclaimed world wheat king for 1935 at a International Live Stock Exposition 17th annual grain show at Chicago. Wilford won the title, one of the major honors of the show, the grain of the Reward variety. His sample weighed 66.6 pounds a bushel.

The 35-year-old Alberta grain grower, who farms 1,200 acres east of Stavely, won the world wheat championship at the International grain show in 1935. Canadian exhibitors won 50 out of 78 prizes awarded for wheat by judges on Sunday.

The first thirty prizes awarded for hard red spring wheat went to Canadians, and out of awards for this type of grain exhibitors from the province received 35.

Great Britain, will firmly support the League of Nations and strengthen her own democracy. She will be unflinching in the support of the League of Nations and the League of Nations.

Responsibility of administration of Alberta rests this week on two members of the Executive Council, Mr. E. C. Manning, provincial secretary who is now acting premier, and Hon. W. W. Cross, minister of health. All the other ministers are away on business, most of whom are in Ottawa with the Premier.

Official estimates on employment, which have been in use for some time by the United States government, but which kept a secret until today, in a 10,015,000 persons were below last September.

They also say that 5,000,000 persons formerly jobless, have now work since March 1933.

Opinion against the press will be admitted to general sessions of the Dominion provincial conferences which opens Monday, was learned. This would be a departure from procedure at previous conferences. Not only has the press always been excluded but official hand-outs from meetings have been generally barren of information.

## To Investigate Buss And Truck Situation

Effort to Secure Uniformity in the Province

Pen. C. D. Howe, minister of highways and marine, told a delegation from the affiliated railwaymen's organizations of Ontario "possibly a royal commission" may be named to examine the whole situation of the use of trucks and busses on public highways.

His first step, through would be an effort to secure uniformity of legislation as between the provinces and the Dominion so as to bring about a similar system as far as possible governing operation of trucks and busses strictly within a province and those who carry on inter-provincial business and commercial motor vehicles which cross the international boundary.

## Britain and States For Trade Treaty

Which is the Best Customer of The Other

Great Britain, and the United States have undertaken preliminary work for the reciprocal agreement, an authority source disclosed.

The United States is one of Britain's best customers and the United Kingdom is a great foreign customer of the U. S. A.

This move follows upon conclusion of a trade agreement between Canada and the United States.

## NEW TARIFF LAWS EFFECTIVE JAN. 1st

Tariff concessions granted at received by the United States in its new reciprocal trade agreements with Canada and Brazil becomes effective with the new year.

The last formality necessary to actual operation of the new tariff as their proclamation Monday by President Roosevelt.

Mr. Jules Levine is in the hospital having treatment for his eyes which were affected while he was working a soldering torch. He is now much improved.

## THE EVER-WIDENING WAVE CIRCLES, OR THE JUBILEE OF THE "LAST SPIKE"

The reversion of the driving of the last spike of the world's greatest transportation enterprise has not caused celebration in the world in the interest of Canada and humanity in general. As is shown in the Montreal Daily Star, Nov. 12, 1925.

## Troops For Africa Are Now Held in Italy

European Tension Over The Sanctions on Italy

Troops which had been expected to depart for southern Ethiopia are still in Italy and a general tightening of defenses, usually well informed sources said today.

All naval leaves also have been withdrawn by Premier Mussolini, it was reported. Relatively some of the sea force were being informed by strategic points against the possibility of Mediterranean hostilities.

The third arm of Il Duce's desires—the air force, one of the most powerful of all—entered into the program of reinforcement under orders by the cabinet that all vacancies be filled.

Speculation arose immediately that troops held back from the east African warfare, and as such air forces were being marshalled for any eventualities arising from European tension over application of League of Nations sanctions on Italy.

## SPECIAL RAILWAY FAIRS FOR CHRISTMAS

Specially reduced fares for Christmas and New Year's between all stations, will be offered by the Canadian Pacific Railway according to information to Mr. Ballantyne Lord.

Single fare and one quarter or the round trip for Christmas will apply from Dec. 23 to 25 with return limit Dec. 26, while for New Year's similar tickets will be sold Dec. 30 to Jan. 1, good returning until Jan. 2.

There will also be a special ticket based on single fare and one third to cover both holidays from Dec. 20 to Jan. 1st and limited for return passage to Jan. 10, 1936.

These fares should prove attractive to travellers who are anxious of spending Christmas or New Year's with relatives or friends.

About 500 buffalo are being slaughtered in the Wainwright park and being dressed for sale in meat markets throughout Canada.

## Legion Now Installed In New Quarters

In One Of The Finest Legion Quarters In West

The local Legion is now comfortably installed in their new quarters in the former Imperial Bank building on Broadway, which they recently purchased. Moving operations were completed last Saturday afternoon and by evening was ready for business.

The fixtures are all modern and the new workwood in the anten department is of an elaborate design and quality adding much to the appearance of the surroundings.

The building throughout has been thoroughly renovated giving it a bright, clean and tidy appearance.

Redcliff can now boast one of the finest Legion quarters in the west.

The Aberhart government has finally decided that all our advertising in Alberta papers will be stopped on Feb. 1. This means a loss of about \$75,000 annually to the newspaper of the province.

Preparations of a monster edition, which will be presented to the king, asking for an examination of the Social Credit policy, was announced at a meeting of the Social Credit club in the Albert Hall London Eng.

Arrangements have been made with the federal government for 25 additional R.C.M.P. officers for unemployment relief work duty in the far north districts where immediate aid is required by farmers whose crops were destroyed by frost. Premier William Aberhart stated in an interview.

Princess Victoria, the future sister of King George VI, died suddenly Sunday. She was 67 years of age.

## Churches

### ST. MARY'S CHURCH

Mass will be celebrated on the 3rd Sunday of each month at 8:30 a. m.

### ST. AMBROSE CHURCH

Rev. H. S. Hammett, Vicar.

2nd Sunday in Advent Dec. 8 8:00 a. m. Holy Communion

10:00 a. m. Sunday School

11 a. m. Holy Communion at Town House.

No 11 o'clock service at St. Ambrose.

7:30 Evensong.

### GORDON MEMORIAL UNITED CHURCH

Pastor: Rev. R. Brinkley Fox

Sunday Dec. 8th 1935.

10 a. m. Church School

11:15 a. m. Morning Worship

Subject: 'Jesus at Capernaum'

7:30 p. m. Evening Worship

Subject: 'Does God Dwell in Man?'

## Name New Members of Grain Board

J. R. Murray replaces J. L. McFarland as Chairman

Western wheat farmers have three new grain commissioners in office with orders from the government to seek world markets for the millions of bushels which judges Canadian elevators.

Hon. W. D. Esler, minister of justice and commerce announced last night that James R. Murray Winnipeg; George H. McIvor Winnipeg; and Dean A. M. Shaw, Saskatoon, had been appointed members of the Canadian wheat board. Mr. Murray replaces J. McFarland as chairman of the new board. Mr. McIvor becomes vice chairman.

At the same time Mr. Esler announced the new board will initiate a policy of selling wheat "to have our surplus restored to a normal basis." This will not involve "fire sale of Canadian wheat," he added, "but it will be for sale at competitive prices and will not be held at exorbitant premiums over other wheat."

The new board Mr. Esler said will seek the goodwill and cooperation of the grain and milling trades in all important crises in an effort to reduce Canadian carry over which has been credited with bearing down on the market, depressing prices.

The Prince of Wales won first prize in the breeding shorthorn division at the international livestock exposition at Chicago with his 2-year old bull, Ramp on Orator.

Strangers in this part of the province are figuring that we have had a very short winter. The mild weather of the past few weeks has convinced them that spring has come.

Word received from Bonaville this week states that Larve Andahl, formerly of Redcliff is very seriously ill at his home in that district. His father, T. Andahl who left for Bonaville last week is still there.

Anxious to register so that they will be eligible for the Social Credit dividend of \$25 a month if and when it is granted, scores of single jobless men from all parts of Canada are drifting into the cities of Calgary and Edmonton daily.

## Useful Xmas Presents For Boys and Girls

Sweaters for Boys From 75c up

Knitted Suits From \$1.50 up

Call and See Our Nice Assortment for Xmas

Children's Shoppe

## Regular Aeroplane Service Across the Atlantic Appears To Be Nearing Realization

Prediction by Dr. Alexander Graham Bell shortly after the Wright brothers made their memorable first heavier-than-air machine flight at Kitty Hawk, North Carolina, that a regular aeroplane service across the Atlantic would be operated during the present generation appears to be nearing realization.

And a more important part of the prophecy, as far as Cape Breton is concerned, is that plans for the ocean service may call for a landing field at Sydney.

It is believed that Sydney is greatly favored as the terminus on the Atlantic seaboard.

Word from Montreal is to the effect that work is being rushed across Canada for completion of the transatlantic airway as fast as European passengers and mail would be less than three and a half days away from St. Lawrence city next year, and less than five days from Vancouver.

Single unemployed men are constructing 14 landing fields along the Dominion at approximately 25-mile distances as part of a gigantic unemployment relief program. Most of these fields are nearly completed now.

Should the transatlantic service be developed, it is believed Montreal would be the main terminal, with aeroplanes connecting there for the western routes. Maritime stops would probably be at St. John's, Fredericton, Moncton and Saint John.

The Canadian airway will go from Montreal to Ellerslie by way of Ottawa, Rimouski, where a radio beacon is being operated by the navy, to the junction point for aeroplanes from Toronto and southern Ontario. Radio beacons are also planned for points near Cobalt, Kapuskasing, and Sioux Lookout, all in northern Ontario. Winnipeg, Brandon, Regina, and Lethbridge will have beacons, and a feeder line will connect with the Arctic air mail routes from Lethbridge.

Approximately 12,000 men have been employed on the airway construction plan. They are housed in camps and receive regular army rations.

Sydney's city council appointed Mayor S. E. Muggah and City Solicitor for Finlay MacDonald as a committee to gather all available information to a transatlantic base being established here. One of the chief advantages Sydney has to offer is that it is the only place on the Atlantic coast with sufficient landing space that is relatively free from fog the year around.

### Aged Farmer A Knight

Has Made Numerous Priceless Gifts To Historical Museum

A farmer-knight has been found in Stockholm. For a lifetime of devotion to the study of Swedish antiquities, a Swedish farmer, G. Carlsson, has been created a knight of the Royal Order of Vasa. Mr. Carlsson, now 70 years old, still recalls studying his first archaeological book as a boy. Twelve specimens, found in the fields of his Province of Scania, were often thrown away as rubbish by his mother in those days. Since then from his farmhouse collection, he has made numerous priceless gifts to the historical museum in Stockholm, Land, and Trelleborg, and has gained fame among archaeologists or Sweden for his unusual knowledge of Scania's ancient history.

### Bit Mad As A Get Away

It's not a fish story that Dr. W. C. Connell, of Stratford, Ont., tells about the one that got away—it's a bird story. He had been shooting pheasants, he said, in a trap carrying two in a bag for about two hours when he heard a whirr—some birds had just been shot and flew away.

Average farm values per head of sheep, swine and poultry in 1934 increased over those of 1933, cattle alone showing slightly lower values. Sheep decreased in value from \$11 to \$20 per head, and other cattle remained unchanged at \$17. Sheep increased from \$1.35 to \$1.50, swine from \$8.50 to \$9.50, and poultry from 66 cents to 69 cents per head.

"Jack," said the plumber's wife as he was leaving home on a busy call, "bring me a jar of cold cream from the drug store when you come back for the tools you're forgetting."

After four days have been isolated on his legs in China, they are examined and the infected ones are sent to market.

### Storing Farm Machinery

Necessary To Protect Machinery From Ravages of the Weather

Proper care should be exercised at all times to protect the large investment in farm machinery from rapid deterioration, rust, moisture, mud, frost and direct sunlight are the most destructive elements encountered by farm equipment.

Storage means protection against these deteriorating effects during the inactive life of the machines and has been found by the Dominion Experimental Station at Swift Current, to be the greatest single factor in prolonging the life of farm machinery.

The most active period of deterioration is during the season of machine use. It is important, however, to protect machinery the year around from the effects of weather. Generous use of paint on all wood and metal parts, and the removal of a dry shed of all state, canvas, knives, ploughs, saws, cultivator teeth, etc., immediately the machine is out of use will help prolong the useful life of the implement.

Pay all bearings with the correct grade of lubricant. Cover all exposed metal parts worn bright from use with oil crankcase or transmission oil before putting the machine aside even for a few days. This will keep out all dirt and moisture from the bearings and the crankcase, thus preventing excessive wear due to rust.

Clean all mud and dirt from the machine, make sure that all dirt is removed from plough or one-way disk bottoms and that they are well greased before leaving. All steel, iron, or wood should be thoroughly cleaned from binders, combines, separators, cultivators, disks, etc., before placing in the paint for storage.

Bright sunlight and moisture cause exposed wooden parts to warp and crack; paint applied early will prevent this destruction. Metal parts exposed will rust and wear; grease or paint will save surfaces.

Excess storage of grain boxes, wooden drills, wagon running gears, and wooden separators is desirable, but not essential. Outside storage of machinery has been found highly successful at the show station when proper care has been exercised to protect against animals and weather by good fences, the use of paint and proper lubricants.

### Chaper Borrowings

Association of Canadian Mayors Would Make Moves To This End

Amendment by the King government of the Federal Interest Act of 1900 might result in a lower interest rate for Canadian municipalities on present and future bond issues. A. A. Huest, of Edmonton, has suggested to the Montreal City Council that he adds that power to call loans at five-year periods might also follow amendment to the act.

A. Huest thinks the Association of Canadian Mayors might like to drive for the amendment in view of the move it made in Montreal last spring for chaper borrowings.

Under the Huest proposition, outlined in a letter, a Canadian municipality having now, or in future, bonds on the market maturing more than five years hence would be at the end of the five-year term have power to call those bonds on payment of principal and interest to add plus three months interest, in lieu of notice.

The Edmonton Aldermen believe there was existence of an amended interest act would induce holders of Canadian municipal bonds to accept interest more in accordance with lower levels ruling in current markets.

Wild Barley  
Shunk-tail grass, or wild barley, is a native perennial occurring from the superior westward, particularly in alkaline soil where better grasses cannot thrive. It is found occasionally in Eastern Canada. This grass is a serious enemy to western stock, being a source of injury to horses, cattle, and sheep through the barbed seeds and awns penetrating the soft tissue of the animal's mouth and causing irritation and inflamed sores.

Psychologists find that paintings placed near the entrance to a gallery in a museum attract more attention than paintings hung near the exit.

Motorists who drive at 60 miles an hour should also be able to think at 60 miles an hour. Which few of them can. 2123

Principal in the vociferous verbal battle over the United States entry in the 1936 Olympic games at Berlin are Jeremiah T. Mahoney, right, of New York, president of the American Athletic Union, and Dr. Theodore Lewald, left, president of the German Olympic committee. Dr. Lewald declared "there is no question of religion in German sports" in reply to Mahoney's charge that Lewald was being used "as a smoke screen to conceal the German Government's most flagrant violations of Olympic ideals for fair play."

### Comical Competition

Whisker Derby And \$100 Prize

Wages To Promote Bred

After 20 days of fair-raising competition, Andrew Duxon was chosen winner of Drumheller "whisker" Derby and a \$100 prize. His fertile face produced the best yield in a field of 27. David Jones was second—four by a close shave.

The contest, run by the Drumheller Miners Hockey Club, brought out miners hopefuls with everything from must Van Dyke effects to uncontrolled coverings bidding for victory on quantity.

Disappointment of entrants who achieved only a dirty face effect was relieved by consolation prizes. The present consumption of beef in Canada per head of population is estimated at 68.66 pounds (56.09 in 1933); pork, 48.34 pounds (74.19 in 1933); mutton and lamb, 6.28 pounds (6.32 in 1933); poultry, 9.9 pounds; butter, 30.95 pounds; cheese 3.64 pounds; eggs, 22.31 dozen per capita.

## The SNAPSHOT GUILD

### LET'S GO HUNTING

It's the wise hunter who keeps his camera loaded and ready to snap the real story-telling pictures at this one.

Don't those cool, crisp fall mornings sort of give you the hunting fever? In spite of all the pleasure you had during the good old summer time you probably look upon the fall hunting season as one of the highlights of the year, and you're enjoying a good evening smoke, isn't it a lot of pleasure to talk over the happenings of the day?

There should be more to a hunting trip, however, than tracking your quarry or anticipating that tense moment when the adrenals of a fine young buck make his appearance through the trees; or he carelessly makes a wild dash into the clearing and you put up a valiant fight against a mere attack of "buck fever".

The appearance of your game and the exciting moment when you quiver at the sight of shooting. "Shooting" with a camera should not be overlooked for it is with snapshots that you can make a picture record of your trip and enjoy your memories over and over for years to come.

Your snapshots can picture your trip from the time you and your hunting pals load your duffel bags, make and make your equipment, until your return with "we hope" a few more snapshots.

Space will not permit enumerating all the picture possibilities on a hunting trip. Picture taking opportunities, however, seem to have the habit of appearing at the most unexpected moments so it's the wise

hunter who keeps his camera loaded and ready for action. But your snapshotting should not be confined to outdoor pictures for it is at night in the cabin or lodge you can take pictures of your party seated around the open fireplace swapping yarns and reviewing expeditions.

You will find that Photoflash bulbs will serve your purpose admirably. A Photoflash bulb is similar in appearance to an ordinary flashlight bulb. This can be purchased at almost any store selling photographic supplies. The flash is set off by pressing the bulb, and it gives an intense light without any noise or smoke.

After placing your camera on a tripod or some solid support look into the finder and be sure you can see all who are to be included in the picture. Set the diaphragm at f/8 or f/11. Set the shutter at 1/25 or 1/30. Then flash the bulb. Be sure to close the shutter immediately after the flash.

It is not necessary to have the camera in a total darkness when flash is made but be sure that your eyes are in shade directly into the lens of the camera.

Make your camera an important part of your hunting equipment and you will have a picture story to show to your friends.

JOHN VAN GULDER.

## Protein Content Of This Season's Wheat Crop Is Shown To Be High

### Friendship Chain Letters

Several Districts Have New Way Of Gathering Patches For Quilts

Quilting bees have been popular during the depression days of harvesting—holocaust—have all the pieces of cloth available and made quilts instead of buying them at the stores. Clubs and societies hold their bees and made dozens of quilts for institutions such as the orphanages, Indian schools, etc.

Now, however, there will be added zest in the popular pastime for it has come under the eye of some shrewdly astute manufacturers, many women who have received what is the latest word in chain letters. Yes, the chain letter has gone right into quilting and it is captioned "The World's Friendship Quilt."

The letter runs on the same principle as all former chain letters, but there is no money to be sent. The receiver of the letter is asked to try on the chain until her name appears at the top of the list, and at that time she will have 200 six-inch squares of quilt, that can be made into a beautiful and elaborate quilt.

Several organizations have already taken a lively interest in the new fad throughout the rural districts of the province, women are getting their letters daily—Hegira Leader-Post.

### Seed Wheat

Advice Concerning Use Of Rusted Wheat For Seedling Purposes

On account of the wheat rust epidemic in the prairie provinces many farmers will be obliged to use wheat seed which has been more or less injured by this disease. Many badly rusted samples have already been tested in the laboratories of the Seed Branch, Dominion Department of Agriculture at Winnipeg, Brandon and Calgary. Germination tests show that even very poor, shriveled kernels are capable of producing seedlings.

These seedlings will be weak and spindly. It should be remembered that germination conditions in the laboratory are practically ideal, and that very many of the weak seedlings will not survive in the field particularly where the moisture and temperature conditions are unfavorable at the time of seeding.

Owing to the size of the rusted kernels there are very many that are very bushy than in normal plump wheat. This means that in spite of the fact that the seed will give a good stand, however, the seedlings will be weak and subject to the attacks of insects and similar diseases. Badly shriveled seed should not be treated with formalin for the control of smut; instead copper carbamate or some other dusting material recommended should be used.

Rusted cereals should be well chanced, and the heavier kernels are used for seedling.

### First Metal Used By Man

Has Many Important And Valuable Uses In Industry

Copper is really worth its weight in gold because of its many important and valuable uses in industry. As a result of its great power of resisting corrosion copper is frequently found in its "native" state, and was therefore, probably the first metal to be used by man. Traces of copper working, dating back possibly as far as 6,000 B.C., have been found in Palestine and Egypt, and the evidence suggests that the art of metal-working was first developed in the valleys of the Tigris and Euphrates, and to the site of the earliest civilization, the famous Sumerian city of Uruk, covered in Mesopotamia below the level of the clay deposit left behind by the Great Flood, which is believed to have occurred about 4,000 B.C. It is probable that the first smelting of copper originated from the discovery of traces of metal which were issued from stones used for primitive camp fires. No doubt this process, discovered by accident, was soon developed deliberately, as many have supposed that the early smelters constructed their furnaces on the windward side of hills, with a trench to act as an air scoop, in order to get a good draft. Today about half the copper produced is used in the electrical industry and about one-fifth in ship-building.

The lovely porcupine belongs to one of the first families of North America. A fossilized lower jaw found in the same strata of Idaho has been determined its antiquity at between 2,000,000 and 20,000,000 years.

A slightly lower weight per bushel and slightly higher protein content than last year's corresponding grades were indicated in the milling and analysis characteristics of the western Canada 1935 wheat crop in a report issued by the research laboratory of the board of grain commissioners.

Considering the general "taking quality," and the report prepared by Dr. F. W. Gordon, (chemist in charge, No. 1 Hard in No. 3 Northern) inclusive this year were not quite equal to the 1934 crop. In the lower grades, the wheat was either equal or superior. The report said this showed the difference in taking quality between the high and low grades was not as widespread as usual.

The rusted grades, Nos. 2 and 3, special, possessed excellent baking strength although they produced abundant amounts of steam during which had a pronounced yellow color. The new hard grades, Nos. 1 and 2, and 3, were of high test weight and good yielding capacity. Like the special grades, however, the flour was distinctly yellow.

### Operating On Building

Cut Five Feet From Middle Then

Instead of slicing five feet off the Olive Street frontage of the Commercial Exchange at the corner of Eighth Street, the Commercial Exchange called for the widening of the street, engineers have decided to cut a strip about five feet wide of the frontage, then roll the skyscraper back from the original building line in Olive Street.

The strippling is thirteen stories and the highest structure ever put on rollers, according to George H. Krenn, president of the Commercial Exchange. He estimates that he will have to slide more than 5,000 tons of steel, brick and concrete, several tiers of offices and stores—five feet without disturbing street traffic or the tenantry of the building. The Commercial Exchange of the post delicate engineering job which has been undertaken in Los Angeles is to be widened the corner of the Commercial Exchange called in engineers and together went into the question of what should be done. They were told that the simplest solution to the problem would be to slice the five feet off the Olive Street frontage of the Commercial Exchange and then construct a new facade, but that would cost considerable money. It would be cheaper, it was pointed out, although the Commercial Exchange would have to pay for the structure, to gouge five feet out of the centre of the building and roll the structure back to the original building line. This plan was accepted and for seventy-seven days builders have been at work cutting away five feet to produce a new facade for the Commercial Exchange, the result of progress.

When the cut has been made and the Commercial Exchange showed the rear section, the two parts will be "sewed" together. When it is complete the structure will show no sign of the major operation which it has been through.

### Special Whisky Trips

Ships Travel Through Cape Horn To

Flavour Lager

Whisky specially matured by a voyage round Cape Horn will soon be on sale in London. Shippers at the port of London have been given the specific instructions that on its own voyage to England it must be carried in the famous Glenlivet bottle. The never shaking the spirit will probably receive as the ship voyages. The constant heaving of the ship and the movement of the wine inside the casks imparts to it an extra "kick".

The year 1935 was an exceptionally healthy one in the United States and Canada, according to life insurance records, which show the lowest death rate on record for that year.

"Man—How long have you been married?"  
"Friend—Let's see—I bought this one!"  
"Man—How long have you been married?"  
"Friend—Let's see—I bought this one!"

"A man with black eyes has been seen in the streets of London. He says a woman was with him."

"A man with black eyes has been seen in the streets of London. He says a woman was with him."

"A man with black eyes has been seen in the streets of London. He says a woman was with him."

DRAFT FORMS FOR  
THE S. C. DIVIDEND

Work on drafting of registration forms for payment of Alberta Dividend is being continued. Acting premier E. C. Manning, although inauguration of these payments is admittedly at least 18 months away. Several drafts of the registration forms have been turned out and revised, and still another revision is now under way, Mr. Manning said.

The Social Credit political party in Medicine Hat has decided to place candidates in the field for both mayor and councillors in the coming civic election. J. H. King will be the mayoralty candidate and Messrs A. J. Hater and H. Weinbauer for the council.

### LIBERTY'S CANADIAN HALL OF FAME No. 3

Stephen Butler Leacock, economist and humorist, noted for his humor and paid four times as much for it by those who have read it than for the money to the students of MCGILL University, where he heads the Department of Political Economy. His fifty-five a satire on England, he made five too eight. It is a black iron ore hair and a Croucho Marx mistake. He should never vote out or support for women. They don't in Quebec, the only place in the Empire where women have to vote. Wear a widely discussed woman coat the pride of all antiquarians and the envy of many a museum. Right generations of mother have been born to it. Like Marx, Twain and Charles Dickens and has written about both. Will be best remembered for Housman's review of twenty years or more ago. Writes in the morning, lunches, and lunch joins the boys after dinner. Glad he crushed farming to teach school.

**"Test"**

HERE at EATON'S, we take nothing for granted. Before we make statement in our Catalogues regarding a piece of merchandise, we satisfy ourselves, by actual test, that the statement is accurate in every respect. Does a manufacturer tell us that the garments he sells to us are "all-wool"? Before we so describe them to you we prove the truth of the statement by scientific test in our Research Bureau. Is a certain brand of safety pins claimed to be "rust proof"? Before we pass them on to our customers as such, we satisfy ourselves by scientific test that the claim is accurate. And so with "prone-hunk" and "all silk" and countless other descriptive phrases appearing throughout the book. Every one of them are capable of definite PROOF, by scientific analysis.

Very important, this, to you as a customer. It means something to know that the merchandise you are ordering is exactly as described down to the last detail—and that you can shop with the same complete confidence as if you had the merchandise in your hands before you. And in the larger sense, how reassuring to know, in common with hundreds of thousands of other Western men and women, that "EATON'S" is the place to buy at EATON'S.

## Breeding Field Corn At Brandon

Experiments Carried On For Over Fifteen Years

At the Dominion Experimental Farm, Brandon, Manitoba, corn breeding studies have been in progress for over fifteen years. At first all attention was given to earliness. By continually selecting ears from early maturing plants, a very early strain was produced. However, this strain possessed several undesirable features. It was too much of the dwarf type and produced too many cobs, and the ears were low on the stalk. Improvement of the strain is being accomplished through two avenues, line crossing and a modified ear-to-row system. In the former, lines are established by inbreeding or self-pollination for at least four or five generations. These inbred lines are usually much less vigorous than open-pollinated plants, but they are valuable in fixing or establishing certain desirable characters. When inbred lines are crossed, the progeny in many cases is more vigorous than open-pollinated plants and gives greater yields both in earliness and seed.

The ear-to-row system is a mass breeding procedure in which the rows from ears making the best showing in previous years are used as male parents. All other rows have the tassels removed as soon as they appear, so that all pollination is by the few selected males. In 1935 ears were gathered from twelve hundred selected plants. Progeny tests have been made since that time. The inferior lines eliminated. In the 1935 test only seventy remain and of these the best twenty-seven are used as male parents. Marked improvements have been made in respect to height of plants, earliness and yield. Corns concerning the latter, the ears are borne well up on the stalk, few being less than twenty-five inches from the ground. To gain extra height of plant, it has been necessary to sacrifice a few days in earliness, hence the most of the best lines are still sufficiently early to mature under average conditions at Brandon.

## Personality Operation

Removal Of Part Of Gland Causes Many Different Types

A new personality operation, which causes things like latent tendencies to come out for husbands was described for the American college of surgeons recently on the eve of its annual convention at San Francisco.

The operation removes a little of the adrenal gland, a structure which supplies the extra energy for anger and for fighting. This gland lies near the kidneys, and hasn't anything directly to do with sex, yet its inactivity is the cause of upsets in masculine and feminine personality traits.

It is one of the endocrine, or ductless glands, which work in series like electric lights on the same circuit. The researchers wish to discover why of the operation for personality were described by Frank H. Allan, M.D., of the University of California medical school.

He said studies of the endocrine glands decided some of the puzzling features were due to the sex section of the adrenal gland, called the suprarenal cortex.

When the cortex gets too active in a child before birth, it can cause a switch in sex. After birth sex cannot be altered, but this cortex possesses the power, if it becomes overactive, to affect personality at any period of life.

## Automobile Accidents

Death Toll In United States Reaches Large Figure

The Washington census bureau counted 1934's automobile death toll at 35,960, a fifteen per cent. gain over 1933 and "a new all-time high."

It averaged the death-rate at 26.9 persons out of every 100,000. In 1933, the rate was 22.3. In 1934, in addition, 1,759 persons were killed in collisions between automobiles, railroad trains and street cars.

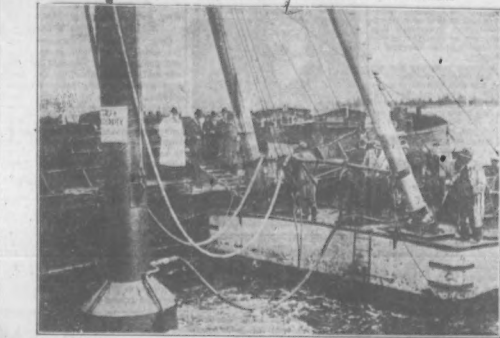

After figures covering 46 major cities for the 23 weeks ended Sept. 25, have indicated the death rate was continuing upward in 1935.

"Ah, Mr. Perkins, I believe you have my nephew working at your office?"

"Not today. It's the first ball game to-day, and he's gone to your funeral."

A municipal hotel where the poor can get a bed for the night for two cents—less than the charge of a Canadian hotel—has been opened at Hankow, China.

## PREPARING TO SEARCH FOR THE GOLD OF THE SPANISH ARMADA

A fresh "gold rush" for the treasures of the sea-bottom has been started by a syndicate formed in Holland which has been built upon value by many millions of dollars from the ships of the Spanish Armada which are still lying on the bottom of the sea in the Bay of Tiberius, Scotland. Here is a picture of a small model of a new salvage apparatus invented by the Dutch engineer W. van Wierp, which will be used during the salvage operation. This apparatus consists of a big tube giving entrance to a wide diving-bell which is illuminated and has communication by telephone with the staff above water.

## World Distance Record

Use Specially Constructed Experimental Craft For The Trip

A world distance record for seaplanes was claimed a short time ago by six United States navy flyers after a 2,387-mile non-stop flight from Panama in a newly designed ship.

The two-motored craft, commanded by the navy's distance flyer, Lieut. Commander Knudsen, sailed to a landing at Alameda, Calif., at 2:21.15 p.m. (P.S.T.) 34 hours and 51 minutes from Panama.

Commander Knudsen said he believed the flight from Panama would better the seaplane distance record held by Carlo Spaggiari, Italian flyer. Spaggiari's mark is 3,065 miles, made in a flight last July from Mafeking, Italy, to Berbera, British Somaliland.

To be considered a record, the mark must better the Italian's record by 100 miles. The seaplane is an experimental craft which utilizes new principles in design. It has postures which form wing tips while in flight and are dropped into landing position before the slightest. This reduces wind resistance.

A whale like tail is constructed to avoid damage in rough water landings. The body is below the wing and a navigator can sit in an open cockpit for observation.

## Find Soil Worth Money

Kobe, Japan, may get an unexpected \$1,500,000 from the sale of soil being excavated for the foundations of the new city hall and the leveling of the site. It was originally intended to use the soil, which is very sandy, in a reclamation project east of the city, but an engineer of the Electric Bureau made the discovery that the soil is particularly suited for moulding purposes. There will be no trouble in disposing of it to engineering firms.

A cubic mile of water contains more than 1,300,000,000 gallons. And there are about 327,672,000 cubic miles of water in all the oceans of the world.

The promoters of the monument, among whom was the crusading Sylvia Paxton, said it was intended to commemorate the action of Lord Londonderry and other British representatives in Geneva, "by whom opposition the proposal to outlaw biplanes was defeated."

R. R. Zephin, secretary of the Ethiopian league, unveiled the monument.

Teacher: "It is possible to have a sentence without a verb?"

Student: "Yes, sir. 'Thirty days'."

## THE REMAINS OF THE NICHOLS PLANE AFTER THE CRASH

This twisted framework above is all that remains of the giant 22-passenger plane which crashed at Troy, N.Y., causing the death of Captain Harry Nichols and serious injury to Miss Ruth Nichols, noted aviatrix. Four other passengers were slightly injured.

## Two Clever Women Workers

One Specialized In Mine Lighting, The Other An Engineer

Mina Monica Maurice, a brunette, with the slender, sleekly groomed outline of the moment, beautiful composed features and smiling eyes is the modern "lady of the lamp."

As manager of a large lamp-making company she has for four years been responsible for the planning and operation of lamps at collieries in every large coalfield in England.

She does much of her work in the mines. This entails her driving an average of 22,000 miles a year.

She hopes to save much time in the future by flying, for she has just obtained her certificate. She is the first woman in Sheffield to do so.

One of her aims is to bring about an international standard for mine lighting.

To this end she has read many papers at international meetings of mining and illuminating engineers in France and Germany, her first when she was 21. She spoke the native tongue in each case, and took part in the highly technical discussions.

To prepare herself for her job, she has studied the history of mining and illuminating engineers in France and Germany, her first when she was 21. She spoke the native tongue in each case, and took part in the highly technical discussions.

But a museum of locomotive roller is increasing and two of the more recent examples from the Caledonian system—No. 23, the last single driving wheel express engine, and No. 303, the old Highland Railway engine—were being withdrawn for preservation as relics in their original form at St. Rollox Works.

Some of the more modern types will doubtless in time become relics as the new locomotive, "Silver Jubilee" to run between King's Cross and Newcastle, is to cover the distance at an average speed of over 67 m.p.h., which puts the 31.7 m.p.h. of the Flying Scotsman into the shade.

This accelerated speed cannot be repeated to England, and one may foresee the day when Edinburgh will be brought within six hours of London—Edinburgh Scotsman.

## Super Traffic Policeman

Device Cuts Traffic Of Waiting Of All Vehicles

A new wonder of traffic control has made its appearance in London, Eng. It is called an "integrator." It is a sort of super-traffic policeman in a little box. It could be heard faintly ticking through its metal cover at Marylebone Circus.

It adds and subtracts the number of vehicles in its "area" although most of them are half a mile distant and hidden by tall buildings.

The "integrator" will shortly be in use wherever useful, in different parts of London.

Briefly this is what it did one day in Gloucester Pl. W—a road much used by private cars avoiding Baker St. to reach Marble Arch from St. John's Wood. Lights are installed in Gloucester Pl. at the blind crossroads.

The "integrator" kept on counting the number of cars in the major road and gave them the main right of way. When one car only approached along a side road the device would stop it.

When two or more cars waited at the blind crossroads, the "integrator" shortened the stop-free period by a few seconds.

Quickly the main stream was halted. And immediately the Gloucester Pl. traffic was liberated.

When there was a lull in the main stream the side road vehicles were given the "go" signal with a delay of not more than a second or so.

The "integrator" cuts down the period of waiting of all vehicles, side road or major road.

## Trade With Russia

Montreal Manufacturers Would Ship Clothing To Soviets

Anxious to export large quantities of made-up goods to Soviet Russia, a group of men's clothing manufacturers in Montreal is prepared to form a special import corporation to achieve that end and is in communication with Hon. T. D. Bourcier, provincial minister of municipal affairs, trade and commerce.

On behalf of the group, A. J. Joseph Schubert announced that about negotiations for resumption of full trade between Canada and the U.S.S.R. follow Mr. Bourcier's conference with the Soviet ambassador at Washington, the clothing trade would like to be borne in mind.

One of the furriers of the automobile and the motorcycle was a bicycle propelled by steam. It was built in 1850 and is now owned by a Philadelphia man.

## U. S. Population

Prediction Is Made That It Will Not Increase After 1960

The New Dealers predict a static population for the United States by 1960.

After another quarter century, the population of the country will cease to grow, causing serious problems in the economic and personal affairs of the nation's citizens, according to the National Resources Planning Board, a body created by President Roosevelt to "plan" the future of the country.

The committee based its conclusions on reports from various state planning boards.

The national committee made no attempt to estimate the total population of the country in 1960, but pointed out that with no further increase in the buying power, progress after 1960 will depend on rising living standards. Birth rates will cease their present decline and aged persons will fill places in industry now filled by youths, according to some of the forecasts.

The national committee said that its studies indicate that following future developments:

"That the population of the United States will become stabilized about 1960;

"That future population distribution will depend on large measures under the development of the country's natural and industrial resources;

"That during the next 25 years, the proportion of the population over 60 years of age will be approximately double the present amount;

"That the number of young people under twenty years will decrease in about the same amount as those over 60 will increase;

"That occupational characteristics of the population will change so that as the mechanization of agriculture and industry increases, opportunities for employment in such new fields as education, recreation, recreation and service occupations will increase."

## Canadian Dressed Poultury

Large And Increasing Shipments Made To British Isles

There has been an exceptionally good market for Canadian dressed poultry in the British Isles this year. From January 1, to September 30, 1935, a total of 2,331,165 pounds of chickens, turkeys, fowl, ducks, and geese have been shipped to the British Isles, compared with a total of 832,000 pounds for the corresponding period last year, and 1,476 pounds for the similar time in 1933.

Of this year's shipments, 1,688,796 pounds were turkeys, 572,325 pounds were turkeys, 30,240 fowl, 47,800 pounds ducks and 2,500 pounds geese. The British Isles have imported about 45,000,000 pounds of poultry and, according to officials of the Dominion Department of Agriculture, Canada has never had a greater opportunity than at present to get a share of the market.

The increased volume of poultry export from Canada proves have been very satisfactory.

However, Canada desires to continue to hold the British market, more attention must be paid to producing milked A and B grades. The majority of poultry that has been exported has been Selected B and C grades, the two lowest commercial grades. Reports received by the Dominion Department of Agriculture from Great Britain would indicate very clearly that better than Selected B and C grades must be shipped if the market is to be held.

The production of milked birds is comparatively easy. All that is required is to crate fatten them from two to three weeks before killing.

A ration of equal parts of ground oats, wheat, barley or buckwheat, mixed with boiled potatoes at the rate of about one-third of the volume of meat mixture and then mix with four milk.

The greatest demand for chickens in the British Isles is for birds of four pounds and under when dressed.

## Cross-Bred Wool

The wool of prime interest in international trade are merino and crossbred. Canada, New Zealand, the British Isles, Irish Free State, Argentina, Uruguay, Chile, and Brazil (which also grows merino) and Spain (which also produces carpet wool) are producers of cross-bred wool.

Merino is the prevalent type of wool of Australia, Union of South Africa, and the United States. Carpet wool is turned out by Soviet Russia, China, India, French Africa, Turkey, Iran, Syria, Peru, Bolivia, Mexico, and Ecuador.

A door-knob is a thing a revolving door goes round without.

## Do You Ever Wonder

Whether the "Pain" Remedy You Use is SAFE?

Ask Your Doctor and Find Out

Don't Entrust Your Own or Your Family's Well-Being to Unknown Preparations

THE person to ask whether the preparation you or your family are taking for the relief of headaches is SAFE to use regularly is your family doctor. Ask him particularly about "ASPIRIN".

He will tell you that before the discovery of "Aspirin" most "pain" remedies were advised against by physicians as bad for the stomach and, often, for the liver. Which is food for thought if you seek quick, safe relief.

Scientists rate "Aspirin" among the fastest methods yet discovered for the relief of headaches and the pain of rheumatism, neuritis and neuralgia. And the experience of millions of users has proved it safe for the average person to use regularly. In four or five infrequent doses.

"Aspirin" Tablets are made in Canada. "Aspirin" is the registered trademark of the Bayer Company, Limited. Look for the Bayer in the form of a cross on every tablet.

**Demand and Get "ASPIRIN"**

**Turkeys To Be Quiet**  
Toronto citizens have many ideas toward the elimination of noise that disturbs their sleep. Action proposed by citizens included rubber shoes for millionaires, rubber baskets to carry milk bottles, rubberized wheels for street cars and a soft composition street car track.

India has a rural-split campaign.

## SETTLING QUARRELS WITH SALT

In far away Borneo, so great is the respect for salt, that quarrels are settled by exchanging handfuls of this precious necessity, vital to life itself. Wouldn't you like to take salt and many other gripping facts in new booklets for Children? "Salt all over the World". Quiet, interesting, customs and stories! Free the imagination! Educational! Fill-in coupon now!

**REVENUE'S** Salt rules, while taking the bath, are refreshing, restful for everyone.

**Regal Table Salt**  
Free Homeing!  
A Winner Here! Product of the world's finest salt works and a healthful mouth wash and gargle.

**WHILE...**  
John Adams paused, unable to remember further, and to the surprise of every one, Matthew, dreamy eyes watching the river, continued:

"While good Franklin brushed along the sage."

Beyond the picket line it was an age.

Of picket line, British never-told was good. Better than dripping hum-rib, cedar wood.

Was saved in bagging, snapping, cracking bright—

Along the bay, Bayou Salade and Night!"

There followed a moment of appreciative silence as Matt continued speaking. Then Luke exclaimed with admiration: "Get brother how'd you remember that?"—while Nancy, realizing that with this honest praise, Matthew's self-consciousness had returned again, tactfully drew attention away from him by asking:

## MISS ALADDIN

By—  
Christian Thompson Farmer  
Author of  
"One With River To Cross"  
"The Unknown Port," Etc.

### SYNOPSIS.

Nancy Nelson is a mid-decades, gay, irresponsible girl of nineteen, with no care beyond the choice of her costume for her coming-out party. Suddenly, in the market crash, her father loses all he has, and the family is faced with the necessity of a simpler method of living. At this juncture a letter is received from an eccentric relative in Colorado, who offers the girl a home on what seems to be impossible conditions.

After much consideration Cousin Columbine's offer is accepted, and Nancy and Jack arrive at Pine Ridge. Nancy set out one afternoon to climb to the top of a hill so as to obtain a view of the surrounding landscape and miss the path Aurora Dubois had told her to follow. A truck comes along the road, driven by Matthew Nelson, and the sister takes the way to go. They ascend the hill, look around, and then go on to Cousin Columbine's.

There, Matt Adams tells Nancy that his brother has been broken his leg and that Jack Nelson has been hired to help John Adams's wife to look after the winter, Jack, and send you back to us. As for Nancy, I don't dare think how still the house will seem without her. I felt like a lost soul the days you stayed at Prairie Ranch."

For the visit to "Uncle Tom's" was over—three days that had softened the memory of those cruel, cold, and sweet plans, leaving instead a vision of flower-dappled prairie.

"If it weren't for this stack of newspapers and letters," Nancy confessed the day she stored them in her trunk, "I wish my glancing experience would cause a dream."

"A nightmare, I'd call it," corrected Aurora. "Victor Tubb says I lost ten pounds during that little stay, and as for Miss Columbine, she'll never be the same woman again. It's my opinion that if I see and John Adams hadn't took their lives in their hands and drove down here to keep her company, she'd have lost her mind."

And it's my opinion," related Miss Columbine, who had come in unobserved, "that you were in a lot more danger of losing yours! Don't talk nonsense, Aurora Tubb."

Nancy laughed at the time, even though something told her that in a measure Aurora was right. One says toll for hours like those, and Cousin Columbine had not escaped. The old lady was a shade less bright, less energetic; and Nancy hated to think how lonely she would be when left with only Aurora Tubb for company.

"If I were twin, or could be in two places at once," she confided in General Grant as she advanced one night, "it would solve the difficulty. What's the use of being a general anyway, if you're incapable of solving it?"

But if the General saw a solution of the problem, he kept it to himself, and the days passed with Cousin Columbine looking a bit grim when she thought no one noticed, and Matthew Adams looking his appetite to the extent that alarmed his treasured mother. And new tickets and reservations were ordered. Mary Tubb had promised (with Victoria's assistance) to watch over the Aladdin Library; and Nancy was conscious of a new sensation, something she described to herself as "a shaking feeling down inside," each time she caught a glimpse of the unsmiling countenance hovering mutely, hopelessly, in Matthew's expressive eyes.

"Did any of those old, old Spanish expeditions come this way?" "I couldn't say, my dear," responded Cousin Columbine. "They may possibly have passed near Pine Ridge, though that, I believe, has not been proved."

And no one dreamed that the girl who sat there, lost to the present in visions of other days, was to discover what looked astonishingly like the missing proof.

### CHAPTER XXIII.

It was on the fourth of July when Jack announced at breakfast that with their departure only two days away, the time had come to tackle the sagging raft posts upon the missing proof.

"You can't put me off another hour," he insisted (when the old lady said: "Butter those posts, Jack. Don't waste your strength on 'em!"). "The two pounds heavier than before the wizard, Cousin Columbine, thanks to those lousy days Aurora's cooking; and those posts give me the heebie-jeebies. If there were time I'd paint the house for you too."

"You may have that to look forward to when you come again," he repeated, answering to a jeaher. "I hope your father will come to the winter, Jack, and send you back to us. As for Nancy, I don't dare think how still the house will seem without her. I felt like a lost soul the days you stayed at Prairie Ranch."

For the visit to "Uncle Tom's" was over—three days that had softened the memory of those cruel, cold, and sweet plans, leaving instead a vision of flower-dappled prairie.

"If it weren't for this stack of newspapers and letters," Nancy confessed the day she stored them in her trunk, "I wish my glancing experience would cause a dream."

"A nightmare, I'd call it," corrected Aurora. "Victor Tubb says I lost ten pounds during that little stay, and as for Miss Columbine, she'll never be the same woman again. It's my opinion that if I see and John Adams hadn't took their lives in their hands and drove down here to keep her company, she'd have lost her mind."

And it's my opinion," related Miss Columbine, who had come in unobserved, "that you were in a lot more danger of losing yours! Don't talk nonsense, Aurora Tubb."

Nancy laughed at the time, even though something told her that in a measure Aurora was right. One says toll for hours like those, and Cousin Columbine had not escaped. The old lady was a shade less bright, less energetic; and Nancy hated to think how lonely she would be when left with only Aurora Tubb for company.

"If I were twin, or could be in two places at once," she confided in General Grant as she advanced one night, "it would solve the difficulty. What's the use of being a general anyway, if you're incapable of solving it?"

But if the General saw a solution of the problem, he kept it to himself, and the days passed with Cousin Columbine looking a bit grim when she thought no one noticed, and Matthew Adams looking his appetite to the extent that alarmed his treasured mother. And new tickets and reservations were ordered. Mary Tubb had promised (with Victoria's assistance) to watch over the Aladdin Library; and Nancy was conscious of a new sensation, something she described to herself as "a shaking feeling down inside," each time she caught a glimpse of the unsmiling countenance hovering mutely, hopelessly, in Matthew's expressive eyes.

"Did any of those old, old Spanish expeditions come this way?" "I couldn't say, my dear," responded Cousin Columbine. "They may possibly have passed near Pine Ridge, though that, I believe, has not been proved."

And no one dreamed that the girl who sat there, lost to the present in visions of other days, was to discover what looked astonishingly like the missing proof.

"You can't put me off another hour," he insisted (when the old lady said: "Butter those posts, Jack. Don't waste your strength on 'em!"). "The two pounds heavier than before the wizard, Cousin Columbine, thanks to those lousy days Aurora's cooking; and those posts give me the heebie-jeebies. If there were time I'd paint the house for you too."

"You may have that to look forward to when you come again," he repeated, answering to a jeaher. "I hope your father will come to the winter, Jack, and send you back to us. As for Nancy, I don't dare think how still the house will seem without her. I felt like a lost soul the days you stayed at Prairie Ranch."

For the visit to "Uncle Tom's" was over—three days that had softened the memory of those cruel, cold, and sweet plans, leaving instead a vision of flower-dappled prairie.

"If it weren't for this stack of newspapers and letters," Nancy confessed the day she stored them in her trunk, "I wish my glancing experience would cause a dream."

"A nightmare, I'd call it," corrected Aurora. "Victor Tubb says I lost ten pounds during that little stay, and as for Miss Columbine, she'll never be the same woman again. It's my opinion that if I see and John Adams hadn't took their lives in their hands and drove down here to keep her company, she'd have lost her mind."

And it's my opinion," related Miss Columbine, who had come in unobserved, "that you were in a lot more danger of losing yours! Don't talk nonsense, Aurora Tubb."

### Anticipating Death

Right Of Person To Take His Own Life In Certain Circumstances

The right of a person to take his own life, in certain circumstances, would be legitimized under a bill proposed by Lord Moyne, a past president of the Royal College of Surgeons. It was reported in London. Suicide is now a "crime" in English law. Certain members of the clergy are said to regard Lord Moyne's project favorably.

Under Lord Moyne's plan, a person afflicted with a painful and incurable disease could request his attending physician for the privilege of "anticipating death" by euthanasia, or painless killing, to be performed under the direction of the physician.

Such a request would have to be accompanied by a sworn statement to the effect that the doomed person's affairs were in order.

**The Talented Soldier**  
The tallest soldier in the French army is causing the French war ministry trouble. Robert Thiry, aged 28, is six feet six inches tall and joined the 10th Colonial Artillery Regiment. When he arrived, a special uniform had to be made for him. He is complaining now that his bed is not long enough to sleep in comfortably. A special one will have to be made.

Rutabagas are prime favorites as vegetables in ancient Greece.

**Valuable Discovery**  
Impressed by the bowler linen worn by the late King of England, the King of Cambodia, a French Indochina, has ordered a mink bowler. Trimmed with jewel with a magnifying glass of brilliant work as a cloak the crown bowler is preserved for exceptional occasions. It is stated that the hat has cost \$4,500.

**Valuable Discovery**  
Mrs. Peck—Now, Harry, what are you thinking about? I can always tell when you have some thought that you are trying to conceal from me. Out with it!

Henry—I was just wondering what the Mormons could use in polygamy.

**Particular—buy your flour by name. Fursty Flour** has enjoyed your confidence for thirty years. Always uniform quality—milled from the world's best wheat—ensures complete satisfaction for every kind of baking.

**FURSTY FLOUR**  
Best for all your Baking

## Now is the Time For This Help In Preventing Colds

Formula Especially Designed to Aid Nature's Defenses in Nose and Upper Throat.

Where Mucous Cells Start PART OF COLDS-COLD PLAN

Don't wait for a cold to develop—order a few drops of Vicks Vapo-Renol today. Vapo-Renol is especially designed to aid and expedite the functions provided by Nature—in the nose—in preventing colds and to drive off head colds in the early stages.

Wash throat with only one or two drops of Vicks Vapo-Renol spray each night. Use in time, Vapo-Renol helps to avoid many colds. Vapo-Renol is especially designed to aid and expedite the functions provided by Nature—in the nose—in preventing colds and to drive off head colds in the early stages.

### New Era in Plane Travel

Stratosphere Ships To Travel Above Clouds At Terrific Speeds

Designers of Britain's next air marvel, the stratosphere aeroplane, hope that it will reach a height of at least 50,000 feet, and travel at speeds equal almost to the 340 miles an hour achieved by the last Schneider Trophy race.

These features are the official aim of the air ministry for the special aircraft being built by the Bristol Aeroplane Company at Bristol.

Details of the machine's design are being kept secret, but the expected performance were made known recently.

This craft may be the forerunner of a new era in long-distance travel. Although balloon ascents have been made in the stratosphere, no aeroplane has carried out any satisfactory tests there. But it is believed that once a machine and engine can be built to reach the necessary height—eight or nine miles up—remarkable speeds will be achieved.

Storms are unknown in the stratosphere and ballistics which have been there report that they never sighted a cloud.

Not only must the engine be super-charged, but the hermetically sealed pilot's cabin must be kept at sufficiently high air pressure to enable a man to live in the rarified atmosphere.

According to the latest estimates there were 50,000,000 sheep in North America in 1934. Canada had 3,400,000. The United States had 23,200,000. Newfoundland 100,000. In 1933, the number of sheep in the world was estimated at 688,500,000.

**CANADIAN  
PACIFIC**

August is the best month of the season to visit when between August 25th and September 1st, the world will compete in the historic Prince of Wales Trophy and the William Cap. The course, a mile above sea-level and set in the midst of some of the most glorious scenery on the continent, is the locale of the play.

**Interesting****Local Items**

Several hunters from near Rathmore arrived in town today to try their luck at the snipe in this district.

Gordon Memorial Church School is holding their Christmas Tree Entertainment on Monday night, Dec. 23rd at 7 o'clock.

Miss Green of the University Hospital, Edmonton, is the guest of Mr. and Mrs. Selborne for a few days.

Mr. M. Harnik was taken to the hospital Tuesday suffering from an infection in his limbs. His condition is now much improved.

The Boy Scouts are entertaining their parents at Scout Hall Friday night. Commissioner Nott will be present and give a short address.

C. H. Werts, of the Broadway meat market, delivered another 50 head of cattle to the feed lot in Medicine Hat last Tuesday. He purchased them from farmers north of town.

Mr. Baanet, Assistant General Manager of the Dominion Trust Co., left for the coast last Monday after spending a month expecting the companies plant here.

On Thursday evening a surprise party was sprung on Mrs. Harnik by her friends. The party was held at the home of Mr. and Mrs. J. Harnik where a crowd had assembled for the occasion, a number of whom were from Medicine Hat. Four tables of cards were played and other games were indulged in after which refreshments were served. The winners at cards were Mrs. Harnik and Mr. Harnik. Congratulations went to Mrs. H. Harnik and Mr. Wm. Wyatt. During the evening a number of useful gift were presented to Mrs. H. Harnik.

Mrs. Hicks left last Tuesday with her son Leonard, on a motor trip to Great Falls, Mont. where they will visit friends for a few days.

Clark Jacobson met with a nasty accident this week as a result of which he lost a finger and had two other fingers badly lacerated. Clark was working a feed chopper when his fingers were caught in the knives.

A number of friends met at the home of Mr. and Mrs. Chas. Fitchner for a surprise party on the occasion of her birthday. Various games were played during the evening and lunch was served. All thoroughly enjoyed the event.

**DECEMBER ENGAGEMENT**

Mr. and Mrs. L. R. Bastien announce the engagement of their eldest daughter Elaine to Mr. John W. Sockop, only son of Mr. J. Sockop. The Marriage to take place on Thursday Dec. 26th at St. Mary's Church, Redcliff.

**CARD OF THANKS**

The local Social Credit group wish to thank Mr. T. Todd for his donation of a panorama view of the Alberta Foothills made of Plaster of Paris. The plaque is a work of art and will be presented to the prize winner at the social credit dance in the G. O. F. hall here on Dec. 31st.
